> Our best thermal printing innovations right at your fingertips, wherever you are.

> Compact and stylish, the cool black B-EP range of 2 and 4 inch portable thermal printers is the ultimate in wireless functionality and reliability on the move.

Lighter, Faster
We have always created the most compact machines on the market. Each one is so small and light that you can wear or carry it and forget that it is there.

Get top quality printed images at top speeds. The B-EP range boasts a print speed of up to 4.13 inches per second (105 mm/second) and a high performance 32 bit RISC CPU ensures lightning-fast processing. With 'peel & present' on demand, simply take a label and the next one is issued in a flash.

Simple to use
For user friendliness and very fast operator training times, there is nothing like the clear backlit LCD read-out on the larger Toshiba thermal printers. So we put it into the mobile range as well, displaying battery level, wireless signal strength, and error messages. There are audible alerts too, just in case.
